# **The ETL Mark of Proven Performance**

**KorKap Has It. Ocal Doesn't.**

**Proven:**

**KorKap gives you 10 times more corrosion protection at no added cost.  
Demand to see this ETL-verified label on your PVC-Coated galvanized rigid conduit.**

# ETL --- THE MARK OF PROVEN PERFORMANCE!

## Fact One:

*KorKap PVC-coated galvanized rigid conduit is authorized to carry both the ETL-verified mark of performance and a UL-rated label.*

*Ocal is not.*

## Fact Two:

*In independent ETL product performance evaluations, KorKap consistently maintained successful bonding of protective PVC coating during extended accelerated adhesion tests.*

*In fact...over the course of 200 hours, KorKap performed ten times more reliably than Ocal.*

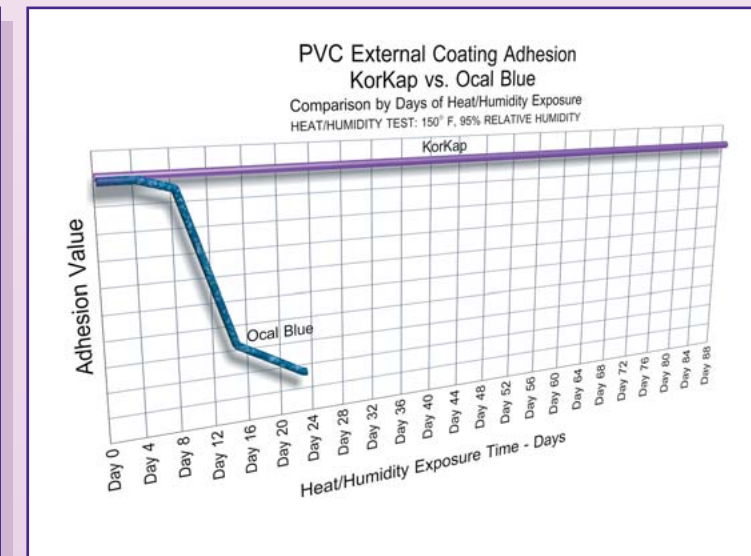

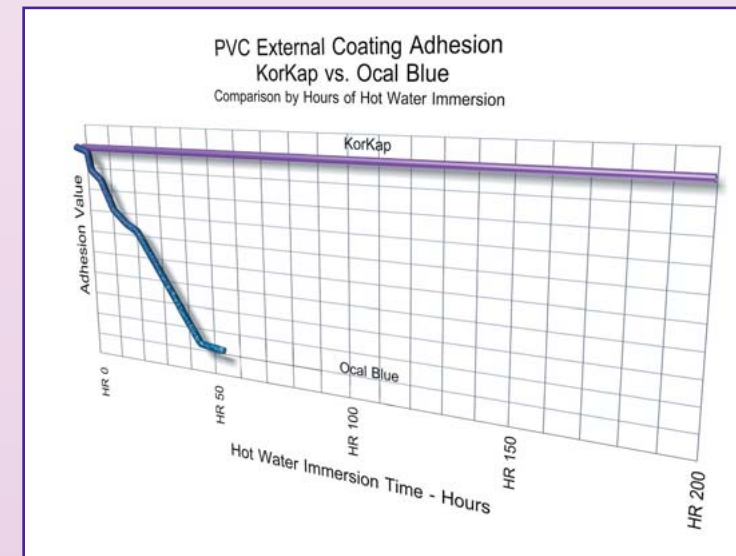

*Ocal's bonding adhesion failed quickly during the identical test. In real life applications failure of PVC to bond with the conduit's metal substrate leads to corrosion destruction and costly product failure.*

## Fact Three:

*ETL-verified heat and humidity tests showed equally dramatic performance superiority of KorKap when compared in identical testing to Ocal.*

## PROVE IT TO YOURSELF.

**HERE'S WHY KORKAP HAS BEEN APPROVED TO CARRY ETL PERFORMANCE VERIFICATION --- AND OTHER CONDUIT BRANDS HAVE NOT.**

## HERE ARE THE BENEFITS OF KORKAP'S ETL-VERIFIED PERFORMANCE...TO YOU!

- Ⓢ KorKap has been proven, in independent testing, to perform ten times better than alternative brands of PVC-coated galvanized rigid conduit.
- Ⓢ Proven KorKap longevity helps you beat the high cost of corrosion and the equally high cost of product failures.
- Ⓢ KorKap delivers its significantly greater performance at no additional cost to you. We will not be beat on price.
- Ⓢ Now all you need to do is "look for the ETL label!"
- Ⓢ The need to write performance specs has been eliminated. Just ensure that your conduit is ETL performance-verified.
- Ⓢ You don't need third party testing. ETL provides independent testing and regular audits for compliance to the performance standard.
- Ⓢ You'll never again be forced to accept PVC coated conduit that you don't want.
- Ⓢ You'll never again need to analyze substitutions. If it doesn't carry the ETL-verified mark... it's not performance-proven!
